Public Cyber Charter Schools: An Essential Option for Brockway Area SD Families and a True Cost Saver for the Brockway Area SD

- Since the onset of the COVID-19 pandemic, public cyber charter schools have not only become an essential option for Pennsylvania families, but also a valued resource for school districts by sharing best practices in virtual learning.
- According to recent data, the Brockway Area SD has determined that it costs \$15,264 to educate a student. Only \$12,596 follows the student to a public cyber charter school. This creates a savings of \$2,669 for the Brockway Area SD for every student who enrolls in a public cyber charter school.
- When students enroll in public cyber charters, the Brockway Area SD keeps 17.5% of the funding they receive for these students even though they are no longer in district schools.
- Taxpayers should be wary about reports implying public cyber charter enrollments create detrimental costs for school districts. In reality, public cyber charter schools receive only about 75% of what the school district receives to educate a student. The balance stays with the district and can be used to support other students and programs.

Public Cyber Charter Schools: An Essential Option for Moniteau SD Families and a True Cost Saver for the Moniteau SD

- Since the onset of the COVID-19 pandemic, public cyber charter schools have not only become an essential option for Pennsylvania families, but also a valued resource for school districts by sharing best practices in virtual learning.
- According to recent data, the Moniteau SD has determined that it costs \$17,110 to educate a student. Only \$12,103 follows the student to a public cyber charter school. This creates a savings of \$5,008 for the Moniteau SD for every student who enrolls in a public cyber charter school.
- When students enroll in public cyber charters, the Moniteau SD keeps 29.3% of the funding they receive for these students even though they are no longer in district schools.
- Taxpayers should be wary about reports implying public cyber charter enrollments create detrimental costs for school districts. In reality, public cyber charter schools receive only about 75% of what the school district receives to educate a student. The balance stays with the district and can be used to support other students and programs.

Public Cyber Charter Schools: An Essential Option for Richland SD Families and a True Cost Saver for the Richland SD

- Since the onset of the COVID-19 pandemic, public cyber charter schools have not only become an essential option for Pennsylvania families, but also a valued resource for school districts by sharing best practices in virtual learning.
- According to recent data, the Richland SD has determined that it costs \$15,377 to educate a student. Only \$11,188 follows the student to a public cyber charter school. This creates a savings of \$4,188 for the Richland SD for every student who enrolls in a public cyber charter school.
- When students enroll in public cyber charters, the Richland SD keeps 27.2% of the funding they receive for these students even though they are no longer in district schools.
- Taxpayers should be wary about reports implying public cyber charter enrollments create detrimental costs for school districts. In reality, public cyber charter schools receive only about 75% of what the school district receives to educate a student. The balance stays with the district and can be used to support other students and programs.

Public Cyber Charter Schools: An Essential Option for Valley View SD Families and a True Cost Saver for the Valley View SD

- Since the onset of the COVID-19 pandemic, public cyber charter schools have not only become an essential option for Pennsylvania families, but also a valued resource for school districts by sharing best practices in virtual learning.
- According to recent data, the Valley View SD has determined that it costs \$14,704 to educate a student. Only \$10,972 follows the student to a public cyber charter school. This creates a savings of \$3,732 for the Valley View SD for every student who enrolls in a public cyber charter school.
- When students enroll in public cyber charters, the Valley View SD keeps 25.4% of the funding they receive for these students even though they are no longer in district schools.
- Taxpayers should be wary about reports implying public cyber charter enrollments create detrimental costs for school districts. In reality, public cyber charter schools receive only about 75% of what the school district receives to educate a student. The balance stays with the district and can be used to support other students and programs.
